

# Twitch Chat Engagement Report

## Summary:

This report analyzes the chat engagement and viewer interaction patterns observed during a Twitch stream hosted by KaiCenat. Key elements included repeated requests for a car horn sound, an active roulette game for betting points, viewer gifts, and comments on the streamer's content. High energy, humor, and active participation characterized the chat.

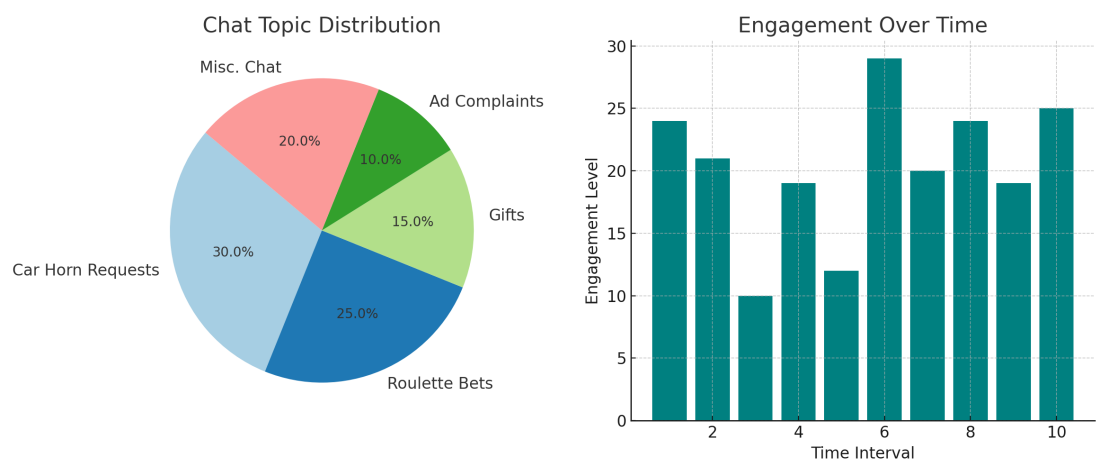

## Engagement Analysis:

The chat was highly engaging, with a diverse range of interactions:

- \* Car Horn Requests: 30%
- \* Roulette Bets: 25%
- \* Gifts and Subscriptions: 15%
- \* Ad Complaints: 10%
- \* Other Chat: 20%

Audience Engagement Score: 8.5/10

This score reflects the chat's active participation, excitement, and the diversity of engagement types.

## Community Dynamics:

The chat exhibited a chaotic yet positive community dynamic. Frequent use of chat commands (like

!roulette, !points, !watchtime) and expressions of humor, anticipation, and energy showcased a highly engaged viewer base, typical of interactive streams.
